

Stainless steel medical cabinet

Stainless steel cabinet with marble top, ceramic basin, sensor faucet, slider drawer.

Size: 210*53*92cm

Configuration

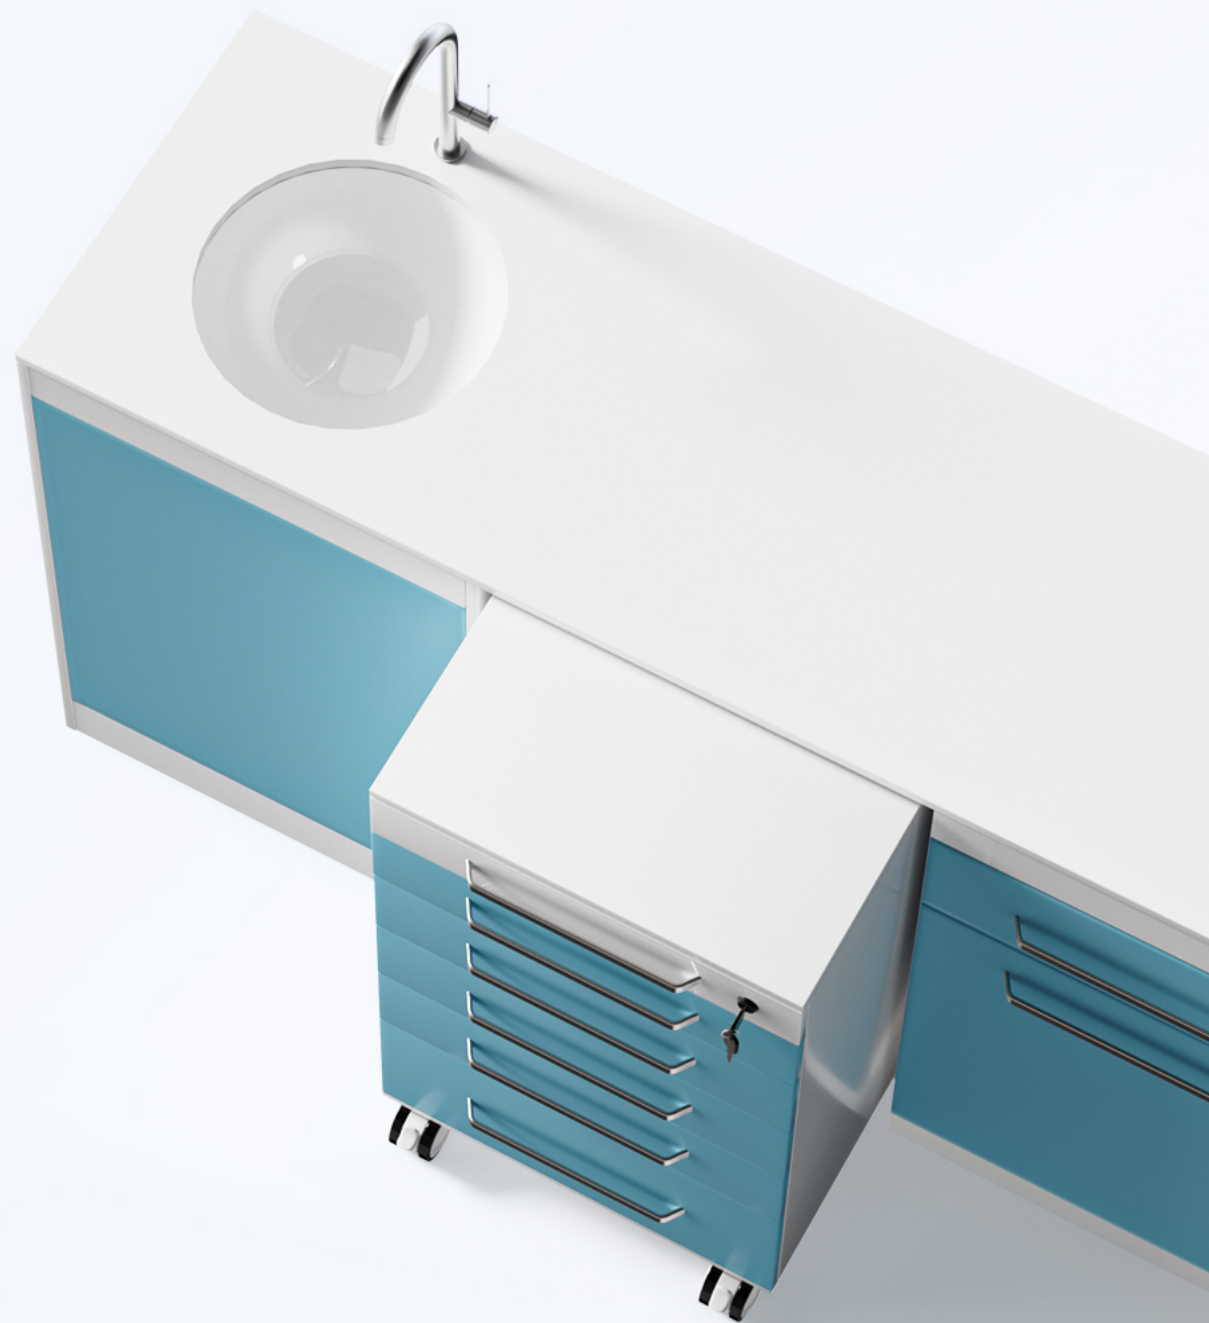

Sensor or
manual faucet

5 drawers,customizable,
each layer bearing 40kg

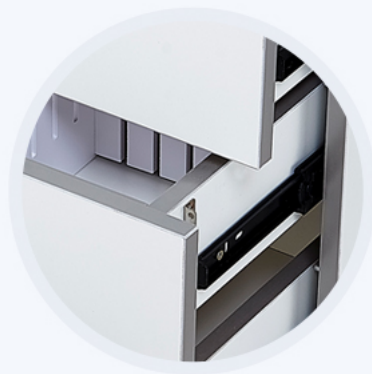

The mobile cabinet can be moved arbitrarily as needed.
The cabinet body does not deform when exposed to high temperature,
which is environmentally friendly and hygienic.

Product Details

Built-in adjustable divider

100000 times of pulling
silent self-closing slide rail

High-Quality Handles

Anti-breaking key
or electronic password lock

Silent universal
wheel(with brake)

Built-in trash
can saves space

Material characteristics:

Six ANTI:

- Anti-Corrosion
- Anti-Mildew
- Anti-Rust
- Waterproof
- Anti-Fingerprint
- Anti-Oxidation

Four Resistance:

- Scratch Resistance
- Wear Resistance
- Moisture Resistance
- High Temperature Resistance

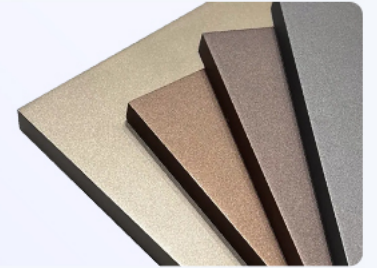

Four NO:

- No Formaldehyde
- No Radiation
- No Odor
- No Paint

Advantage:

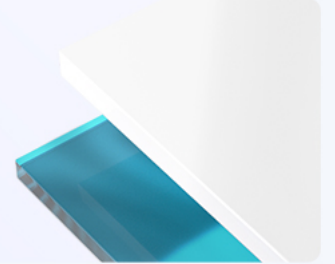

1.

A grade stainless steel material, rustless, high hardness, it will not be out of shade for more than 8 years.

2.

Tabletop: Artificial marble and tempered glass are available. High hardness, not get scratched by knife.

3.

Imported drawer slide, the more load bearing also enable the cabinet soft closing.

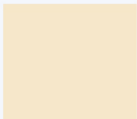

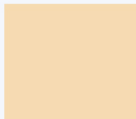

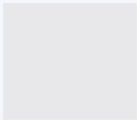

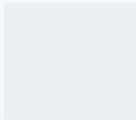

4.

Warranty: 3 years, free spare parts for replacement.

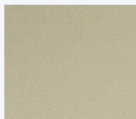

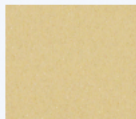

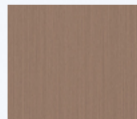

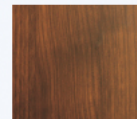

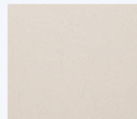

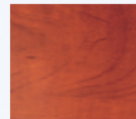

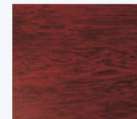

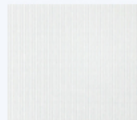

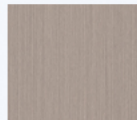

Optional countertop Colors:

Regular color:

							
HB02	HB03	HB10	HB04	HB09	HB22	HB29	HB11
							
HB23	HD01	HB28	HB30	HC85	HC100	HC95	HC96

Wood grain color:

							
HB26	HD32	HD02	HC66	HC82	HB16	HB15	HC19
							
HC30	HC31	HC41	HC25	HD31	HD22	HD23	HD21
							
HC20	HC39	HC41	HC44	HC83	HB20		

Efficiency and hygiene:

Say goodbye to clutter

Create a comfortable and safe diagnosis and treatment environment
Embrace an efficient sterile space

EU Standard:

Comparison between zinc plate & stainless steel

Comparison Dimensions	Zinc plate	Stainless steel	Better
		First choice	
Durability	The zinc layer is easy to rust after wear and tear, and the service life is 3-5 years.	Strong corrosion resistance, lifespan 10-15 years.	Stainless steel
Hygiene and cleanliness	The coating is prone to aging, harbors bacteria, and is difficult to disinfect thoroughly.	Seamless and easy-to-clean surface, supports strong disinfection.	Stainless steel
Load-bearing stability	The structure needs to be strengthened, and it is easy to deform after long-term use.	High rigidity, strong load-bearing and no deformation.	Stainless steel
Aesthetic maintenance	The coating is easily scratched and faded, making it look old.	Long-lasting metal texture and strong sense of professionalism.	Stainless steel
Long-term total cost	Frequent replacement and high maintenance cost.	Long life and low maintenance cost.	Stainless steel
